# SOCIOLOGY FOR IAS

## Upgradation Test Series

### "UPSC Criterion for Mains"

The main exam is intended to assess the overall intellectual traits and depth of understanding of candidates rather than merely the range of information and memory"

### Focus of the Test Series

- Development of Answer Writing Skill.
- Understanding your current state preparedness & required plan of action.
- Focus on structure & presentation of answer according to requirements of the questions.
- Understanding the alignment of Theory, Facts, Sociological Studies & Personal Observation of Current Socio-Economic & Political Affairs in the answer.
- Understanding actual requirement (Key words, Context & Content) in the different marks types questions (30 Marks, 20 Marks, 12 Marks).
- Understanding the type of questions to be attempted for good score (strategy & approach).
- Evaluation of the answer sheet in the context of demand and dynamism of the examination.
- Personal discussion session for in-depth explanation of answer of every question.
- Personal counseling session to fulfill specific competitive needs of the students.

### Plan and Philosophy of the Test Series

- Our plan facilitates 'Demand Based Supply' & cover whole syllabus according to the dynamic pattern of Mains Examination.
- All Test will be based on Changing Nature and Pattern of questions being asked by UPSC and will be conducted under examination situation on weekly basis at the institutional venue.
- Our Test plan is supplemented by detailed suggested reading for every topic. Explanation & analysis of the test with personalized attention. Special focus would be on model answers.
- We will leave no stone unturned to develop your dedication, determination, sincerity and commitment to yourself & to the preparation.
- We guarantee you that our sincere efforts will help you to fetch good marks.

Be a lamp unto yourself

- Gautam Buddha

### Instruction for the Students

- Try to write the answer according to the actual requirement of the questions.
- Focus on Key words & Tail words effectively (Elucidate - Explain, Comment, Examine, Critically examine, Discuss, Analyze, Illustrate, Review, Argue, Justify etc.)
- Understand the context of the questions. Content of the answer should be in the contextual framework.
- Ensure proper systematization of the structure of the answer. Proper consideration of priority and focus of given ideas is must.
- Logical structure of sentence and their alignment. Present relevant information, choice of words and proper statement.
- Proper visibility of idea through alignment Theory, Facts, Sociological Studies & Personal Observation of Current Socio-Economic & Political Affairs according to the requirement of the question.
- Impressive beginning and Conclusion of the answer. Give your opinion when asked for it. Incorporate your opinion from different perspective in a balance manner.

Section - A

Q1. Write Short Answer of the following in about 150 words each :

(10x5=50)

Q1(a) Discuss the relationship between concepts of Society and Nation State.

Society can be considered as a network of relationships among the members of it, on the institutions that arise out of patterned social interactions among them. Nation-state can be considered as a state, all whose members feel a part of the same nation.

There is intimate relationship between society and Nation-state. A society as diverse as India, can be considered as a collection of different Nation-states, though not in formal, but informal sense, because different region of the country have different culture, language, history, way of life, etc. kind from as a member of one social-group.

On, the other hand, a society which considers itself as a nation, can be divided across different nation-states. For instance, Kurds who consider themselves as a part of nation, are divided across

Introduction should be short

Use short paragraph

Use of table will be better

Iran, Iraq, Syria, Turkey.

When the members within the society feel that they share certain common characteristics, and want to be governed by themselves, it may give rise to self-determination movements, and rise of nationalism, which ultimately results in formation of Nation-states. Rise of many nation-states in the post-French Revolution period is a case in point.

→ Add conclusion separately

Q1(b) The citizenship as a concept is constantly evolving with changes in society. Do you agree? Substantiate your viewpoint. (10 Marks)

Citizenship is a very dynamic concept, which has been changing over time as the society changes.

This concept evolved as a result of French-revolution, which argued that members of a nation have certain inalienable rights and right and obligations to the state.

with the rise in the aspirations of the people, political and legal rights were provided to the citizens, and they were considered formally equal.

T. M. Marshall, in his famous definition defined citizens as 'equal and free members of a political entity'. He bundled certain civic, political and fundamental legal rights with the citizen.

Marxists, view equal membership to citizen as illusion, because they consider that state is a bourgeois state and promote ruling class ideology. Formal

Plato, Aristotle  
↓  
limited citizenship

Social

equality without substantive equality is of no use for them.

Feminists, on similar lines as Marxists argue that formal equality in modern capitalist society, without concern for patriarchy and gender-inequality is a useless concept.

In the globalised world, many scholars have argued for the concept of global-citizenship and de-linking citizenship with a particular nation-state. They argue for universal rights which must be provided to humans, irrespective of their geographical affinity, according to Yasmin Soyasle.

Q1(c) "The sex is gendered." In the light of the above statement bring out distinction between sex and gender. Trace the factors that contribute to women's subordination. (Marks 10)

Sex is the biological distinction between male and female, whereas gender can be defined as the cultural defined notion of masculinity and femininity.

This concept of gender was brought to sociology by Ann Oakley. She considered that gender is a social construct, which depends on the social perception of the difference between male and female.

Many scholars as Louis Morgan, Talcott Parsons, John Bobbey had considered the division of labour among male and female as sexually determined. Thus, resulting inequality as natural. They argue that women because of their biological and genetic characteristics, which are different from male, such as, child-bearing capacity, brain-lateralization, presence of progesterone and oestrogen etc. are best suited for certain work like household chores, child-care, fuelwood collection, primary socialization

Focus equally on both parts.

Gender Refer to difference in attitude and behavior product of the socialisation. include different expectation of role.

of young, expressive women in stabilization  
of adult personalities etc.

Feminists such as Ann Oakley, Margaret Mead, Ruth Bleier rejected such a view, and argued that division of labour and resulting social gender-inequality is a cultural construct and not a biological phenomenon.

Margaret Mead, through her study & 'Sex and Temperament among three primitive Tribes', showed that concept of female

masculine which is generally associated with female and male, is not universal

& rather culture specific, thus changes from society to society.

4 1/2

Q1(d) How has the ICT (Information and Communication Technology) become an agent of social change? (10 Marks)

Science and Technology has always been a prime mover of social change. change in technology not only make change in material world, but also cultural world and subsequently within the whole society.

Louis Morgan argued that technology is the primary source of social change. As technology changes, the social, economic and cultural aspect of society also changes. He viewed evolution through various stages

Savagery → Barbaric → Civilization

William Ogburn through his concept of 'cultural lag' also argued that as material aspect changes, it brings corresponding change in cultural aspect as well.

ICT has been an agent of social-change in following way →

1) Education field is one of the primary beneficiary. Online education, various study group satellite channell, computers, laptops,

BET  
ICT

Used for empowerment

Homogenizing tendency

equal opportunity for all. new medium for impersonal communication

internet based free education channels such as unacademy, onlyias, NPCTL etc, have removed the geographical and economic barriers to education.

2.) Health → Telemedicine, remotely operated operations, health tools, applications for mobile which measure heartbeat, calories burn, the distance covered while running, and many more such technologies have changed traditional way of healthcare.

3.) In globalised world, satellite communication and television, mobile communication and data, social media, entertainment channels have changed the culture through acculturation and diffusion. McDonaldization and etc. are some of its artifacts.

1.(e) "Social conflict is both a cause and consequence of social change."  
Explain. (10 Marks)

Social conflict can be considered both as a source and the result of social change.

Social Conflict as a cause of social change - Marxian perspective views the inherent conflict in the economic infrastructure, between the haves and the have-nots as a perpetual source of social-change. This conflict results in the change in the mode of production, and development of new forces of production and relationship of production.

For example :- In the medieval society, the capitalists and workers together brought and end to feudal society and replaced feudal mode of production with capitalistic mode of production, thus brought a change in society.

Social Conflict as a consequence of social change

Social conflict can also be a result of a social change. Functionalists view society as a system, with its various sub-system in a state of equilibrium,

weber  
Karl  
Marx  
↓  
class struggle  
is the driving force behind social change.

Cyclical theories of social change by Spengler, Pareto, Toynbee and Sorokin also support idea.

which is dynamic in nature. These subsystems are related to each other, that interdependent and interconnected. Therefore, change in one component without correspondingly change in another causes disequilibrium to be disturbed and brings social conflict.

For example - Shah of Iran brought modern changes in education, democratic system, equal rights to men and women. But, without corresponding change in the cultural system which was still traditional. This led to Iranian Revolution and change not only in the political, but also social setup.

Add many more eg.

Q2(a) "Power is a zero sum game." Compare Weber's and Parson's perspective in the light of the above statement. (20 Marks)

Power as defined by Weber, is the capacity of the individual or a group of men to influence the decision in a communal action, even against the wish of those who participate in the action.

Weber considers a power is Relative that is it is relative to another social group. Those who hold power, maximize the interest of their group at the expense of other social groups. That is, if power is held by one group, the same is not available to other group. Therefore, Weber's view of power can be seen as Conflict point of view. He

Weber viewed power as a zero-sum game. He divided power into legitimate power (authority) and illegitimate power, (coercion). According to him power is authority, that is who hold power, exercises authority.

Parsons viewed power from functionalist perspective. He defined power as,

'The degree to which the societal resources are mobilized to fulfil the objectives, over which society has value-consensus.'

Thus, his view of power is consensus based, and views it as variable, against the constant sum view of Weber.

Parson's view of power is variable view because it is held by society as a whole. The amount of power depends upon the value consensus within the society. Thus, high value-consensus leads to greater-power, and low value-consensus leads to low power.

Both view viewed power from different perspective and tried to enrich sociological knowledge about power.

Elite theorist like Gaetano Mosca and Vilfredo Pareto criticized consensus view and argued that power is not held by society

as a whole, but by an elite group, who have better personal attributes than the rest of the masses.

Similarly, Marxist too criticized Parsons view of power, as they view power being exercised by the ruling minority to further their interest, not of the society's interest as a whole. Their view of power is also a constant Scam view of power.

Parson.

- ① Power is like resource of a society
- ② Power can be used to attain goal of society
- ③ neglect dysfunction of power

Q2(b) Discuss the role of education as an instrument of social change. Illustrate your answer with concrete examples. (20 Marks)

Education as a source of social change has been viewed by different scholars.

Max Weber argues that rationalization of social life lead to rise of capitalism, in which education played an important role. Similarly, in modern industrial society, middle class exercises considerable influence through market relevant skills, and there is heterogenization of classes, contrary to polarization what Marx had predicted. In contemporary society market situation decides class situation, which is obtained on the basis of educational qualifications.

Innovating Knowledge, Inspiring Success.

Emile Durkheim viewed education from functionalist perspective. He argued that as moral and physical density increased, the need of society also increased. This led to differentiation and specialized division of labour, which was possible through education system. Thus, it transformed

Good  
Attempt

mechanical solidarity of pre-literate society with organic solidarity of modern industrial society, and brought about social change. For, instead, different professions today depend upon one another for fulfilment of their requirements.

Ernest Gellner viewed education as essential for bringing nationalization in the western European society.

Benedict Anderson also argued that concepts like print capitalism and imagined community help to better understand the rise of nationalism, which are made possible through education.

For example, national freedom struggle of India was made possible by the press-media during the freedom struggle. It brought people of different community together and brought value-consensus and social-solidarity and proved decisive to bring freedom.

<sup>Part</sup>  
~~1~~ Marx viewed education as a tool to spread the ruling-class ideology and perpetuate the false-class consciousness among proletariat. He viewed education serving the interest of ruling class.

Antonio Gramsci viewed education an essential component to bring proletariat revolution, as it will help in gaining cultural domination. Antonio Gramsci used the concept of Hegemony to explain this.

Thus, education has always played as a source of social change, viewed differently by different scholars.

Innovating Knowledge. Inspiring Success.

Q2(c) Illustrate the contemporary dynamics of kinship as social capital (10 Marks)

Social capital is defined as the set of values, belief system, culture that are shaped within the society.

Social capital has been changing with the changing structure of kinship system. Traditionally, in the pre-industrial society kinship formed the basic unit of social organization. It performed the social, economic, political, educational, cultural functions for the society. Socialization and internalization of social values, norms, beliefs formation of social-relationship was largely governed by the kinship system. Thus, it played important role in shaping social capital.

With the invention of machines and advent of industrial revolution kinship became a secondary social organization unit. It was largely confined to nuclear family. Talcott parsons says that 'isolated nuclear family' is the typical family in modern industrial society.

Now place of kinship have been overtaken by.

- ① friends
- ② classmates
- ③ neighbours
- ④ office staff
- ⑤ maid
- ⑥ Helper etc.

Thus, new social groups like peer-groups, occupational groups, clubs etc. came into prominence, and largely replaced kinship as the basis of social capital.

But, the above observation is more valid for modern industrial society. In the 3<sup>rd</sup> world countries, which are still transitioning to industrialization phase, kinship still plays a dominant role in determining social capital.

a

Q3(a) Discuss in detail the link between development and dependency. Support your answer with appropriate examples. (20 Marks)

Development can be defined as the desired change in the social, economic, political, cultural and various other dimensions of social life in the desired direction.

Andre Gunder Frank has done a study on the link between the development of the 3rd world countries of Latin America and their dependency on the well developed industrialized nations.

He argues that though these countries are free from colonization, but suffering from neo-colonialism, in which they are dependent on the developed countries for the fulfilment of their requirements.

He argues that though developed countries claim to help these 3rd world countries, but they are actually exploiting these countries, by making them dependent on them, and in return exploiting the natural and human resources.

Discuss in detail  
dependency theory.  
Wallerstein  
world system theory.  
Neo-dependency theory.  
etc

- This exploitation is done in following way-
- 1.) Latin American countries are specialized in production of one or few primary products, these products are required by developed countries. In return, developed countries supply finished product, thus continuing the unequal trade-balance of colonial era, by draining them of their resources.
  - 2.) The monetary help provided by developed countries to these underdeveloped countries forms just the negligible proportion of their GDP.
  - 3.) International organizations like IMF, WB provide help to them, but impose strict trade regulations, thus perpetuating their exploitation.
  - 4.) Investment by capitalists in these countries are exploiting the cheap labour, and has also focused on cash crop production, which devastated the traditional food crops, and brought them towards starvation.

Thus, Gunder Frank argue that the artificial dependency created by the developed nations is the reason behind the

development deficit of the Latin countries. Many other scholars counter this simplistic explanation. They argue that the help provided is directed into military exploits, used by the elites and not used efficiently. Thus, it's problems of these countries itself.

[Amartya Sen] also argues that connection with developed countries has helped in bringing [technology-transfer].

Further, this theory does not explain the rise of tiger economies of south-east Asia.

Though, not entirely true, but it provides one of the plausible explanation for backwardness of many 3rd world countries.

Add application of this theory to India, Jharkhand, Orissa, Chattisgarh, Bihar

Q3(b) Using concept of Manifest and Latent functions, analyse the implications of "right to privacy as a fundamental right" in Indian society. (20 Marks)

Manifest and Latent functions form two of the important concepts of R.K. Merton, which he explained in his paradigm of functional analysis.

Manifest functions are those functions which are intended and recognized on the other hand latent functions are not recognized nor intended. For instance, the manifest function of demonetization was to fight black money, corruption and terrorism, while its latent function was formalization of digital economy.

Supreme Court of India has declared "right to privacy" as a fundamental right. Its Manifest and Latent functions are →

Manifest functions → • Now individuals will have freedom in their private sphere.  
• No agency can collect or use user data without consent of user.

• Leakage or unauthorized use of user data could bring penal actions.

These manifest functions have very deep implications →

- 1) Indian government will have to take appropriate steps to safeguard the humungous data stored. Ex:- Aadhar related data.
- 2) Citizens can drag public and private institutions to court in case of violation. Thus, it has strengthened democracy.
- 3) It will lead to development of many new technologies - Big data analytics, encryption, virtual computing, artificial intelligence as required for protection of data.

Latent functions →

- Bringing up data protection law
- Increase in litigation due to more cases.
- more employment as a result of development of new technology
- Debate on section-377 could be revived
- Phone-tapping etc. could be debated

The implication of the latent functions is that it might result in new institutions.

Improve alignment

being set up to protect citizen's data. It has strengthened civil society vis-a-vis the government which might lead to discussion on issues related to legalization of LGBT sex (section-377). This shows the judiciary as a source of social change. It might give rise to new social movements related to similar issues.

Use short paragraphs

Thus, Manifest and Latent functions as a powerful concept not only show the intent behind any social phenomenon, but also help to explain why certain social institutions despite being dysfunction continue to exist until their functional consequences of

Conclusion should be short

Q3(c) Discuss the changing nature of family and marriage in India.

(10 Marks)

Family in India had been traditionally been joint-family, which performed the various social, economic, political, cultural, educational and many more functions. Due to modern forces of industrialization and modernization, the joint family started to disintegrate and nuclear family became the norm. But, there are many variations of family, and Pauline Kolonda has very well gone beyond joint-nuclear debate and prepared a 18-type family typology. A.M. Shah contends that household should be considered as the basic unit for sociological analysis, and argues that it is the joint-household that has undergone disintegration and not joint-family. I.P. Desai in his study of mahua village also made similar observations. Many new type families - single parent family, gay families, lesbian families etc., though very few in number has started to make appearance. live-in-relationship has given a new dimension to family.

marriage in Hindu-tradition had been  
considered as sacred sacrament and inviolable.  
But, with Hindu-Marriage Act, 1955, it has  
provided with divorce. Traditionally, marriages  
were within castes (caste-endogamy) and  
inter-religion marriage were uncommon. Now,  
due to modernization and urban life-style,  
inter-caste and inter-religion marriage have  
become more common. Even government is  
promoting such marriages.

Now, because of modernization and  
effect of media, love-marriages have grown  
in number. Divorce rates have also shoot up  
with the widespread in nuclear family,  
there is shootup in strengthening of conjugal  
bonds over affinal bond.

(10 Marks)

**Section - B**

Q4. Write short answer of the following in about 150 words each :

(10 x 5 = 50)

Q4(a) Examine the role of voluntary associations in transformation of society.

Voluntary associations are the civil society organisations that aim to promote the interest of the society as a whole.  
These are non-state and non-market based social-association acting to promote public welfare.

Their role in transformation of society -

→ Since post-LPG reforms, the role of state in social-sphere is declining, which is being filled by the voluntary organisations many NGO are working for eradication of poverty, welfare of downhoddren, old-age people, widows, physically disabled etc. Thus, some of the functions of state have been transferred to them.

→ These voluntary associations also play dominant role in shaping political decisions and thus working to fulfil interest of their members through interest groups/pressure groups.  
Ex: FICCI, CII, NSUI etc.

Sociological Role  
↓  
Helps in social protest, movement and social change  
↓  
Help in transformation of anomic condition to normal condition

→ many trade unions and agriculture-labourers association make demand for betterment of their situation, thus making a case for their welfare.

→ many voluntary groups work to promote civil-rights and human rights, thus act as an guardian agent for protection of these rights.

→ many social movements such as anti-corruption movement led by Anna Hazare, bring out public issue and help create appropriate legislative provisions.

On dysfunction side, many vested interests are also forwarded by them which threaten social-solidarity. Associations such as caste-based groups, religion-based group, ethnicity-based groups etc. promote demand sometime contrary to national interests and in narrow interest of their members only.

**Evaluative Indicators:**

	Excellent	Good	Satisfactory	Average	Poor
(i) Introduction	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(ii) Content- Prioritization	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

(v) Novelty-Correlation & Application	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(vi) Language Competency	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(vii) Legibility of Concepts, Theories & Facts	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(viii) Conclusion	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

6

Q4(b) To which extent religion is responsible for increasing fundamentalism in the society? Discuss with examples. (10 Marks)

Fundamentalism can be referred to as the literal interpretation of historical scriptures in contemporary time, and promotion of ideologies which emerge out of such interpretation in the social, economic, political and cultural realm of society.

According to Anthony Giddens, there are two main reasons for spread of fundamentalism -

1.) Reaction of 'fundamentals' to moral crisis in society -

According to this fundamentalism arose in response to degradation in the moral values or imperial (moral) in the society as a result of industrialization and modernization. As a response to this, moral values in religious scriptures were promoted to save traditional institutions such as marriage, family, kinship, religion etc.

2.) Contra-aculturative response -

According to this, due to acculturation and diffusion of modern-western culture

to 3rd world countries, which are still largely based on traditional social institutions, created identity-crisis. Traditional value system, such as family, marriage, religious ideology etc. were under threat. To remove this alienation they adopted contra-aculturative responses by advocating religious values present in traditional texts.

good  
Am,

Thus, it can be seen that decline in the moral values (moral crisis) and threat to traditional social institutions because of modernization fueled fundamentalism, and religion provided as an anchor to cling to those values.

Q4(c) How the theory of 'cultural lag' helps in understanding the social change? (10 Marks)

'Cultural lag' theory by William Ogburn provides one of the <sup>cultural</sup> explanation for the social changes in which technology acted as the agent of social change.

According to this theory, material aspects of society, that is technology, art, architecture etc. changes rapidly in comparison to non-material that is cultural aspects. There exists an equilibrium between cultural and material aspects of society.

Due to technological changes, material aspect changes, without corresponding change in non-material aspect, thus disturbing the equilibrium. This period of disturbance produces social conflict within society.

When non-material aspect has changed to match the corresponding material aspect, new equilibrium is established and society adapts to new order.

How  
cultural  
lag  
affect  
social  
change.

For example - When computers <sup>were</sup> introduced in India, government employees resisted this change, because they still had view of working in older setup.

Subsequently, with the benefits arising out of its adoption, the attitude of government employees changed.

Some scholars criticize this theory, arguing that it does not prescribe clear demarcation between material and non-material aspects.

Further, some argue that, in contempon-ary times, due to globalization, non-material aspects change faster relative to material aspect.

Q4(d) "Ideology is crucial for social transformation in a democracy." Discuss.  
(10 Marks)

Ideology can be viewed as a coherent set of ideas, which provide an explanation for current social setup, and provide way to transition to a model social setup as envisaged by it.

Max Weber viewed ideology as a crucial tool to bring about social transformation as shown in his study 'Protestant Ethic and the Spirit of Capitalism'.

In a democracy it's very important for social transformation. The ideology of the ruling class exerts important influence on the course of social transformation.

For example- Post independence India was ruled under socialist ideology. Post 1991 reforms, India transitioned under to capitalist blend socialist ideology, thus bringing change in society.

① Ideology provides a broad frame of action and collective mobilization.

② Ideology also establishes the identity of the group vis-a-vis other group.

3) Ideology indicates the goals and means and form of practical activities of groups & individuals

These changes included - transition to capitalist mode of production, dominance of service sector, banking reforms, corporate reforms, disinvestment etc. were carried out.

Apart from ideology, there are other crucial factors such as intervention of state, education, technology, cultural contact, change in mode of production, rationalism etc. which play an equally important role in bringing social transformation in a democracy.

Karl Marx viewed ideology as promoting the interest of ruling class, and perpetuating false class consciousness among proletariat.

Q4(e) Analyse different types of religious practices among tribals with examples from western and eastern societies. (10 Marks)

Animism and naturalism are two main types of religious practices among the tribal practiced even today.

The concept of Animism as the earliest form of religious practice was given by E. B. Taylor. Animism can be considered as 'belief in spirits'. Taylor argues that this religious practice developed to satisfy man's intellectual needs. To differentiate between live and dead and to account for visions and dreams, humans conceptualized spirit. It temporarily left body when in sleep and permanently when dead. Humans come to associate spirit with animals, birds, stone and other <sup>animate</sup> animate form of objects.

many tribes in central India, such as Gonds, Oraon, Santals and even caste Hindus believe in spirits in the form of 'Atma'.

Naturalism was conceptualized as the earliest form of religious practice by Max Muller. He argued that this practice

Use  
Short  
Paragraph

developed to satisfy human's int emotional need. As nature is full of wonder, surprise, miracle, so early humans could not comprehend it. Awed by the power of the nature, humans began associating natural features with persons, thus they personified nature. Air became 'Vayu Devta', fire became 'Agni Devta', etc and started respecting and worshipping it. Tobriand island follows practice this practice.

Totemism is another religious practice, found in tribes such as Arunta Tribe of Australia. Totem is a symbol, whether animate or inanimate, which is considered as sacred and becomes the symbol of tribe. Totem comes to represent the belief, values and practices prevalent in the social group. Durkheim argued that through totemism, humans worshipped society itself.

Q5(a) How the social structure impacts the process of political participation?  
 Discuss with examples. (20 Marks)

~~Traditionally, Indian social structure was marked by caste-based stratification system. The political elites, mostly were derived from Hindu community and dwija caste from Hindu community and Ashrafs from Muslim community. They were western educated, had an open and liberal intellect and believed in the western concept of liberty, equality and fraternity. The participation of lower-shastra into political realm was negligible.~~

later

Political participation refers to the process through which public participates in the decision making process in political sphere. Various tools of political participation are - voting, social movement, interest group, pressure group, political discussion, etc.

Social structure of a society impacts the process of political participation in various ways. It decides, which class are

Question  
 How factors like family, education, caste, religion, economic status, values, norms etc. affect voting behavior

ruled class and which are subject class.  
In medieval <sup>European</sup> society, society was classified  
into estate system of social stratification -  
clergy, noble and commoners. Religion has  
influence over whole spheres of society.  
Education was religious and non-utilitarian.

In such social setup, which was  
characterised by agrarian mode of production  
and subsistence economy, political participation  
of masses was minimal. Though, they provided  
almost all the taxation, they had disproportionate  
representations. They had very limited rights.  
Ruler's word was law.

with the coming of Renaissance and  
subsequent industrial revolution, the social-  
structure started changing. capitalist mode  
of production replaced agrarian, estate based  
stratification started crumbling, new middle  
class (bourgeoisie) started emerging which  
owned mode of production. Industrial setup  
led to mass movement of workers from  
agrarian to industries. Religion was restricted  
to private sphere. Feudal mode of production

was abolished. Family and kinship ties started transforming in the industrial capitalist setup.

In this new social structure, idea of republic, liberty, equality and fraternity came out of industrial <sup>French</sup> revolution. Enlightenment thinkers like Locke, Voltaire, Rousseau etc. talked about limited state rights and more citizenship rights. Nationalism started emerging. Different interest group representing various social categories came up which demanded safeguard of their rights. Various social movements led by different social groups came up. Thus, it led to the political participation of hitherto unrepresented groups.

Thus, it becomes clear that polity being a part of the society, undergoes change as social-structural changes.

Q5(b) Discuss the characteristics of New Social Movement. How is it different from conventional understanding of social movements? Explain with suitable examples. (20 Marks)

New Social Movements are the new strand of social movement, which are not class-based or nationalistic movement. They combine many newly emerging issues within their demand and not narrowly focused as class-based and nationalism movement.

Characteristics of New Social Movement

1.) They are not class based movement

They are also not national freedom movement

2.) These movements combine many new issues - gender based issues, tribal issues, environmental issues within their umbrella

Ex! - Narmada Bachao Andolan, not only raised agrarian issues, but also environmental issues and tribal issues.

Poin main ke social and cultural

3.) These movements have their membership cutting across different classes.

Mainly young middle class

4.) These are issue based movements.  
Example - Chipko Movement was targeted to address not only environmental concerns, but also the economic and political issues.

5.) These movements are not political party led movement, but they are by civil-society.

Conventional social movements have been led by a particular social strata, that is either caste-based or class-based.

Nationalistic movements for freedom struggle can also be included within its realm.

Ex: movement led by Sri-Norayan Guru for upliftment of Dalits can be considered such a conventional social movement.

NSM.  
① Use of social-media and technol.  
② promote their own expert.  
③ Have both global and local orientation

with the growth of the modern culture and with globalization, new social movements have crossed national boundaries. For example - movements to show solidarity with LGBT, saw participation across the world. Social media have also provided a new platform and globalised the world. For example: #metoo campaign to bring out the issue of female sexual exploitation can be considered as such movements.

Q5(c) How is the increasing use of technology changing the status of disabled and women in Indian society? (10 Marks)

Technology has always been an <sup>active</sup> agent of social change. In Indian society, it has both functional and dysfunctional consequences for status of disabled.

Many new technological innovations, artificial limbs, retinal transplant, Braille, automated wheel chair and many more have helped in making them independent and their social inclusion in society. They can use digital library to enhance knowledge. These and many similar innovations have helped in ending their alienation and helped in social integration.

But, on dysfunctional front, family members <sup>remains</sup> busy on electronic gadgets, and don't provide the proper care to disabled, thus leading to further alienation.

For women, technology has opened new vistas for women. Due to increased structural differentiation and division of labour, women are taking up new employment opportunities, thus

① -ve  
② +ve  
↓  
empowerment

Economic empowerment leading to more power in family and society. Technological innovations like washing machine, microwave etc. have reduced work-burden and women can take-up full-time-job, thus, [Symmetrical family] based on strong conjugal bond is rising. Thus, impact of patriarchy is coming down.

On dysfunctional front, mobile phones, social media etc. have given rise to violence against women both in public and private spheres. Glass-ceiling still prevents women from rising up on economic ladder. Pink-jobs still hold the traditional division of labour.

Thus, technology have both functional and dysfunctional consequences for disabled and women.
